

Lubab Sheet-Davis
Managing Director, Lam Research Corporation

Lubab is Managing Director at Lam Research Corporation (LRCX) where she serves as a catalyst for innovation and technology development. She manages strategy and communications for the Corporate Technology Development organization and leads global university research collaborations and corporate innovation programs. She is also building an emerging semiconductor technology scouting discipline.

She serves on the Board of Directors of Silver Aqua, a social enterprise bringing low cost water treatment to at risk populations. She also serves on the steering committee of Joint Venture Silicon Valley's Surplus Harvest initiative and is a mentor for the Gratitude Network.

Lubab has 25 years of corporate development experience. Her professional background includes ten years at Lam Research Corporation in corporate and technology strategy – working directly with executive leadership on mergers & acquisitions, venture investments, the long term research group organizational design, technology portfolio management and innovation. Prior to Lam she spent five years at Semiconductor Equipment and Materials International, where she established an emerging technology vertical for the global not-for-profit association. Prior to SEMI, she was co-founder and Vice President of Content for an e-commerce start up, SemiSales. As an entrepreneur, she was one of only 12 alumni recognized for leadership by the Santa Clara University Leavey School of Business. She started her career at Rose Associates providing customized market research and management consulting services to global materials companies.

Lubab is passionate about poverty alleviation, focused on providing food and water security, and the environment. She served on the Board of Directors, including as Chairperson, for non profit organizations including The Youth Foundation, Loaves & Fishes Family Kitchen and Sustainable Community Gardens.

Lubab holds a Bachelor of Science degree from San Jose State University and a Masters of Business Administration from Santa Clara University. She has completed the UC Berkeley Center for Entrepreneurship Engineering Leadership Professionals Program. She lives happily in Mountain View with her husband and enjoys trekking, gardening and cooking.
